General Information

Publication data: ACTA DIABETOLOGICA LATINA appears six times a year. The six issues constitute one volume. Supplements (monographs or conference proceedings) are published occasionally.

Subscription price per volume US \$ 50 (Lit. 30,000) including postage by surface mail.

If required issues can be sent by air mail at an extra charge of US \$ 9 (Lit. 5,400) per volume and US \$ 1.50 (Lit. 900) per single issue.

Price per single issue US \$ 10 (Lit. 6,000).

Special price, only for Members of Diabetology and Endocrinology Societies, US \$ 35 (Lit. 20,000) per volume.

Prices quoted do not include supplements.

Advertising: orders for advertisements should be sent to the Publishing House (see below).

Books for review: books for review should be sent to the Publishing House (see below).

1. The first part of the paper discusses the importance of the study of the history of the United States. It is argued that the study of the history of the United States is essential for a full understanding of the country and its people. The paper then discusses the various methods used by historians to study the past, including the use of primary and secondary sources, and the importance of critical thinking in the study of history.

2. The second part of the paper discusses the role of the federal government in the development of the United States. It is argued that the federal government has played a central role in the development of the country, and that its actions have shaped the course of American history. The paper then discusses the various policies and programs of the federal government, and the impact of these policies on the country.

3. The third part of the paper discusses the role of the states in the development of the United States. It is argued that the states have played a central role in the development of the country, and that their actions have shaped the course of American history. The paper then discusses the various policies and programs of the states, and the impact of these policies on the country.

4. The fourth part of the paper discusses the role of the people in the development of the United States. It is argued that the people have played a central role in the development of the country, and that their actions have shaped the course of American history. The paper then discusses the various policies and programs of the people, and the impact of these policies on the country.

5. The fifth part of the paper discusses the role of the economy in the development of the United States. It is argued that the economy has played a central role in the development of the country, and that its actions have shaped the course of American history. The paper then discusses the various policies and programs of the economy, and the impact of these policies on the country.

6. The sixth part of the paper discusses the role of the culture in the development of the United States. It is argued that the culture has played a central role in the development of the country, and that its actions have shaped the course of American history. The paper then discusses the various policies and programs of the culture, and the impact of these policies on the country.

7. The seventh part of the paper discusses the role of the environment in the development of the United States. It is argued that the environment has played a central role in the development of the country, and that its actions have shaped the course of American history. The paper then discusses the various policies and programs of the environment, and the impact of these policies on the country.

8. The eighth part of the paper discusses the role of the military in the development of the United States. It is argued that the military has played a central role in the development of the country, and that its actions have shaped the course of American history. The paper then discusses the various policies and programs of the military, and the impact of these policies on the country.

9. The ninth part of the paper discusses the role of the education system in the development of the United States. It is argued that the education system has played a central role in the development of the country, and that its actions have shaped the course of American history. The paper then discusses the various policies and programs of the education system, and the impact of these policies on the country.

10. The tenth part of the paper discusses the role of the social system in the development of the United States. It is argued that the social system has played a central role in the development of the country, and that its actions have shaped the course of American history. The paper then discusses the various policies and programs of the social system, and the impact of these policies on the country.
